## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

This instant application is directed towards an unobvious improvement in the impeller mounting art. Particularly, the application claims: an impeller being formed of a first material and being mounted on a shaft by means of an insert that is an interference fit in the impeller, the insert comprising a second material of greater strength than the first material, and a constraining ring comprising a material having a greater strength and lower coefficient of thermal expansion than the first material. The constraining ring surrounds at least a part of the axial length of the impeller that overlies the insert.

While prior art references such as Mukherjee et al. and Clavell (3,019,039(teach the use of an insert to mount the shaft to the impeller wheel and Kruger teaches the use of a constraining fiber ring made of a material of lower coefficient of thermal expansion to maintain a shrink fit between a rotor shaft and turbine shaft, there is no motivation or teaching that would provide for the insert being of greater strength that the impeller material or motivation to modify the impeller wheels of Clavell or Mukherjee et al. such that they incorporate a constraining ring surrounding a part of the axial length of the impeller and having a greater strength and lower coefficient of thermal expansion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3745

## Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwayne J White whose telephone number is (571) 272-4825. The examiner can normally be reached on 7:30 am to 5 pm T-F and alternate Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look can be reached on (571) 272-4820. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
